Interests:

Artificial Intelligence

I am interested in developing computer systems that can solve a variety of problems using human-level intuition.

Sustainable Farming

I believe we should grow our food sustainably, and I grow vegetables in my greenhouse.

Travelling

I believe travelling creates open minded individuals who are more adept for diverse workplaces.

Places I've Traveled

As a Computer Science Major, I think it would be hypocritical to only give you a

boring old paper resume; check out my

projects and passions here:
